# CSS **Declarations**

HTML course

# CSS declarations: Lesson Plan

## 1. Values and units

- Length
- Colors
- Text

## 2. Figma

# CSS Declarations

# N

# Length

# Length units

Absolute

# Units

– fixed physical unit (1/96th of an inch (0.25mm))

px

`width: 100px;`  
`height: 100px;`

`margin: 20px;`  
`padding: 20px;`

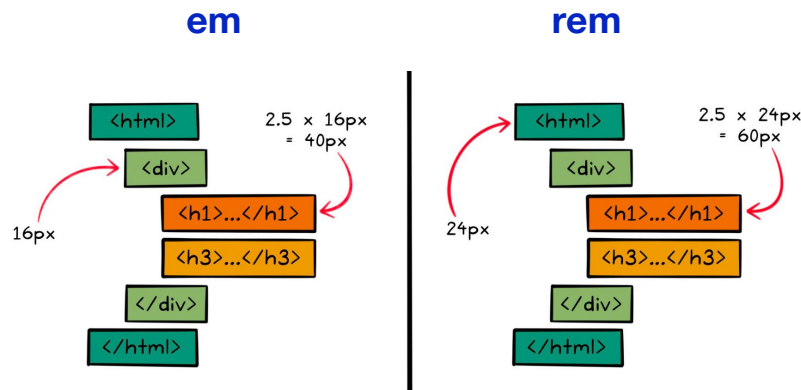

`font-size: 15px;`

## Relative

# Units

- **em** (from parent) / **rem** (from html tag)
  - **font-size: 1.5rem;**
  - **font-size: 1.2em;**
  - **margin: 0.5rem;**
  - **padding: 0.8em;**
- **%** (relative to parent element's property)
  - width: 50%;**
  - height: 75%;**
  - margin: 10%;**
  - padding: 5%;**

# N

# Colors

# Colors

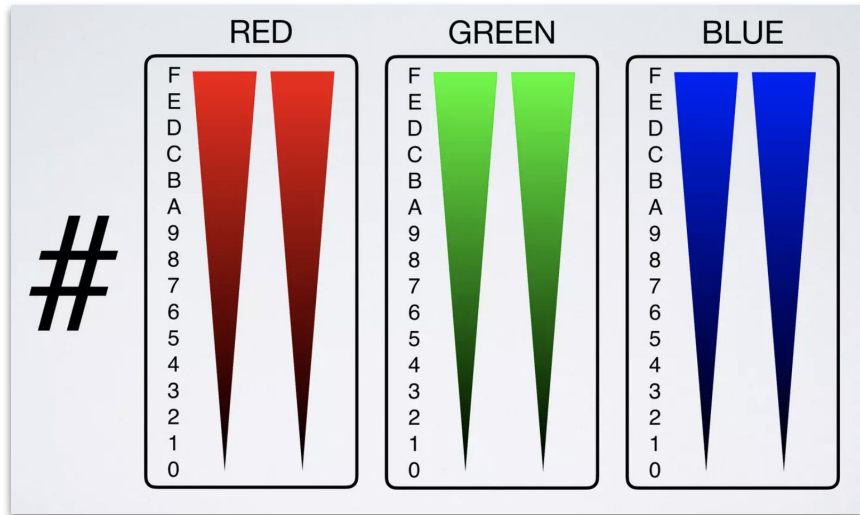

## Colors in CSS

- hex / hexa
- rgb / rgba
- color keywords
- currentcolor
- transparent

Properties:

- color
- background-color
- text-shadow
- text-decoration-color
- border-color
- box-shadow
- outline

Color

# HEX/HEXA

```
p {color: #FFAA00;}
```

```
p {color: #FA0;}
```

```
p {color: #FFAA0000;} <- full transparency
```

```
p {color: #FFAA00FF;} <- full opacity
```

consists of:

- digits from **0** to **9**
- letters from **A** to **F**
  - **0** – black color
  - **F** – full color
- hexadecimal system

Color

# RGB/RGBA

```
p {color: rgb(0, 0, 0);}  
p {color: rgb(100%, 100%, 100%);}  
p {color: rgba(50%, 10%, 60%, 1);}  
p {color: rgba(31, 250, 118, 0);}
```

consists of:

- digits from **0 (black)** to **255 (white)**  
or
- from **0% (black)** to **100% (white)**
- transparency from **0 (transparent)**  
to **1 (fully opacity)**

RGB

**New Notation:**

```
p { color: rgb(100% 100% 100%); }  
p { color: rgb(255 255 255 / .5); }  
p { color: rgb(0 0 0 / 50%); }
```

- no commas
- alpha channel is separated by a slash – /
- alpha channel can be in %
- not supported by older browsers

Color	Name	Hex	RGB
	aqua	#00FFFF	0, 255, 255
	black	#000000	0, 0, 0
	blue	#0000FF	0, 0, 255
	fuchsia	#FF00FF	255, 0, 255
	gray	#808080	128, 128, 128
	green	#008000	0, 128, 0
	lime	#00FF00	0, 255, 0
	maroon	#800000	128, 0, 0
	navy	#000080	0, 0, 128
	olive	#808000	128, 128, 0
	purple	#800080	128, 0, 128
	red	#FF0000	255, 0, 0
	silver	#C0C0C0	192, 192, 192
	teal	#008080	0, 128, 128
	white	#FFFFFF	255, 255, 255
	yellow	#FFFF00	255, 255, 0

## Keyword

# currentColor

– Inherits the **color** value from the element or parent.

```
div {  
  color: red;  
  border: 5px solid currentColor;  
}
```

The border color will be red.

```
div {  
  color: red;  
  border: 5px solid currentColor;  
  color: yellow;  
}
```

The border color will be yellow because of the cascade rule.

```
div {  
  color: green;  
}  
div p {  
  border: 5px solid currentColor;  
}
```

The border color will be green because the color is defined by the parent.

Useful for making the color of a vector icon match the text color.

## Keyword

# transparent

– Fully transparent.

```
div {  
  color: transparent;  
  border: 5px solid transparent;  
}
```

The text will take up space on the page but will not be visible. Its outline will also not be visible.

Other ways to set a fully transparent color:

```
color: rgba(0, 255, 0, 0);  
color: #FFFFFF00;
```

**opacity: 0;** – the entire element will be transparent

N

Text

Text

Working with

# Text

- **color**
- ***font-style***
- font-weight
- **font-size**
- **line-height**
- **font-family**

```
body {  
  font-style: italic;  
  font-variant: small-caps;  
  font-weight: bold;  
  font-size: 16px;  
  line-height: 1.2em;  
  font-family: Arial, Helvetica, sans-serif;  
}
```

CSS

# font-family

font family =

- A font from the design
- A web-safe font
- Font type

This ensures the text looks as similar to the layout as possible, even if the preferred font isn't loaded.

```
font-family: 'PT Sans',  
Arial, sans-serif;
```

Types of fonts:

- **Serif** – Fonts with small lines at the end of characters
- **Sans-serif** - Fonts without those lines
- *Cursive* – Handwriting-like fonts, often with connected letters
- **Monospace** - Fonts where all characters have the same width
- **Fantasy** – Decorative fonts

# Web-safe

## Fonts

### Sans-serif

- Arial
- Verdana
- Tahoma
- Trebuchet MS

### Serif

- Times New Roman
- Georgia
- Garamond

- Courier New (**monospace**)

- Brush Script MT (**cursive**)

```
font-family: "Inter", Arial, sans-serif;
```

```
font-family: "Playfair Display", Georgia, serif;
```

## Connecting

# a Font

1. Open [fonts.google.com](https://fonts.google.com)
2. **Search** for the desired font
3. Choose the desired styles
4. In the side panel, select the **"link"** option
5. Copy the **code and paste** it into the `<head>` tag in the HTML
6. Set the font for the page in the **CSS file**

2

# Styles in Figma

font-weight

font-family

font-size

letter-spacing

line-height

color

color opacity

The image shows a screenshot of a Figma design tool interface. On the left, there is a dark blue rectangular area containing white text. The text is partially visible and appears to be a paragraph about NFTs and a game called Balthazar Dragons. On the right, there is a white panel with a blue border, titled 'Typography' and 'Fill'. The 'Typography' panel has several settings: 'Bakbak One' for font-family, 'Regular' for font-weight, '52' for font-size, '62' for line-height, and '-0.5px' for letter-spacing. The 'Fill' panel has a color picker set to 'F8F7FF' and '100 %' for color opacity. Arrows point from the text labels to the corresponding settings in the panels: 'font-family' points to 'Bakbak One', 'font-size' points to '52', 'font-weight' points to 'Regular', 'line-height' points to '62', 'letter-spacing' points to '-0.5px', 'color' points to 'F8F7FF', and 'color opacity' points to '100 %'.

**border color**

**border width**

**border style**

# or Use Figma Dev mode

1. 15€ per month
2. You can copy and paste CSS code from Figma

# N

# Summary

# Summary

1. Units of measurement and colors used in CSS
2. How to link fonts
3. How to work with styles in Figma

# Homework

1. Add a font using Google Fonts.
2. Write basic styles for the marked-up blocks of the layout using Emmet right away:
  - font size / line height / font type / font weight - font-\*
  - text color
  - background color
3. **Optional:** Connect ``normalize.css`` to Binabox project as a separate file.

# Quality Criteria for HTML Course

❤️ Mandatory for passing the course

💛 Required for the highest grade

💚 Optional

❤️ 2.1. Single CSS File.

💛 2.2. Include Normalize.css

❤️ 2.3. All fonts used in the design are connected to the pages.

❤️ 2.4. Provide fallback fonts and family types at the end of the font list.

❤️ 2.5. Do not use !important in CSS.

❤️ 2.6. Do not use #id for styling.

💛 2.7. Avoid nesting selectors more than two levels deep.

💛 2.8. Avoid styling tags directly

❤️ 2.10. Use consistent units for element sizes and positioning.

💛 2.11. Colors should be in a consistent format (hex or rgba).
